Category:	Third-party libraries	**Estimated time:**	0.00 hour
Target version:	4.2.0		

Description

The attached patch updates Tribute, a JavaScript library used for inline issue auto-complete (#31989), from 3.7.3 to 5.1.3.

One of the most interesting features of the latest Tribute is multiple trigger characters added in Tribute 4.1.1. I think we can add several nice features to Redmine by making use of it, for example, auto-complete for wiki macros that can be invoked by typing "{{".
