Redmine - Defect #33432
Rendering of Macros with (empty) text parameter different in preview and non preview mode
2020-05-11 13:57 - Holger Mößinger

Description

Macros with empty text parameter are rendered differently in preview mode vs. non preview mode.

The preview mode seems to parse the the closing double curly brackets as text parameter and does not stop until the next macros double curly brackets, while the non preview mode parses an empty text parameter.

The sample code below shows demonstrates this with the collapse macro, but it happens for any macro which allows a text parameter and the two attached images.

This might be an issue with a greedy regular expression.

Test code for the bug in Redmine 4.x

{{collapse(Collapse 1)}}

Above is a empty collapse macro which renders correctly in preview and in wiki view.

{{collapse(Collapse 2)}}

Above is a empty collapse macro which renders correctly in wiki view but this text (and the following macro up to its closing curly brackets) will not be visible in preview mode.

{{collapse(Collapse 3)}}
This is a block of text that is collapsed by default.
It can be expanded by clicking a link.
}}

Above is a non empty collapse macro which renders correctly in preview and in wiki view.

Test code for the bug in Redmine 4.x

{{collapse(Collapse 1)}}

Above is a empty collapse macro which renders correctly in preview and in wiki view.

{{collapse(Collapse 2)}}

Above is a empty collapse macro which renders correctly in wiki view but this text (and the following macro up to its closing curly brackets) will not be visible in preview mode.
This is a block of text that is collapsed by default. It can be expanded by clicking a link.

Above is a non empty collapse macro which renders correctly in preview and in wiki view.

Environment:
- Redmine version: 4.1.1.stable
- Ruby version: 2.6.6-p146 (2020-03-31) [x86_64-linux]
- Rails version: 5.2.4.2
- Environment: production
- Database adapter: PostgreSQL
- Mailer queue: ActiveJob::QueueAdapters::AsyncAdapter
- Mailer delivery: smtp

SCM:
- Subversion: 1.10.4
- Git: 2.20.1
- Xitolite: 2.20.1

Redmine plugins:
- additions: 2.0.24-master
- redmine_advancedimage: 0.0.4
- redmine_agile: 1.5.3
- redmine_checklists: 3.1.16
- redmine_filelinks: 0.0.0
- redmine_git_hosting: 4.0.2
- redmine_latex_mathjax: 0.4.0
- redmine_lightbox2: 0.5.1
- redmine_local_avatars: 1.0.0
- redmine_mentions: 1.0.0
- redmine_postgresql_search: 1.0.6
- redmine_recurring_tasks: 0.3.4
- redmine_reporting: 2.0.6
- redmine_wiki_lists: 0.0.9
- redmine_wikiapproval: 0.0.0
- redmine_wikiforms: 0.0.0
- redmineup_tags: 2.0.8
- sidebar_hide: 0.0.8-fix

History

#1 - 2020-05-16 05:28 - Go MAEDA
- Category changed from Wiki to Text formatting
- Status changed from New to Confirmed

#2 - 2020-05-21 05:00 - Yuichi HARADA
- File 33432.patch added
It seems that the line break code is different between preview mode and non-preview mode.
So preview mode doesn't seem to match the regular expression ApplicationHelper::MACROS_RE.

preview mode(Linebreak: "\n"). Since the input value is posted via JavaScript, the line break code is replaced from "\r\n" to "\n".

"Test code for the bug in Redmine 4.x\n
|\n|\n|\n|\nAbove is a empty collapse macro which renders correctly in preview and in wiki view.\n|\n|\n|\n|\nAbove is a empty collapse macro which renders correctly in wiki view but this text (and the following macro up to its closing curly brackets) will not be visible in preview mode.\n|\n|\n|\n|\nThis is a block of text that is collapsed by default.\n|\n|\n|\n|\nAbove is a non empty collapse macro which renders correctly in preview and in wiki view."

non-preview mode(Linebreak: "\r\n")

"Test code for the bug in Redmine 4.x\n
|\n|\n|\n|\nAbove is a empty collapse macro which renders correctly in preview and in wiki view.\n|\n|\n|\n|\nAbove is a empty collapse macro which renders correctly in wiki view but this text (and the following macro up to its closing curly brackets) will not be visible in preview mode.\n|\n|\n|\n|\nThis is a block of text that is collapsed by default.\n|\n|\n|\n|\nAbove is a non empty collapse macro which renders correctly in preview and in wiki view."

Fixed the regular expression. I think this will solve the problem.

Thank you for posting the patch. But I think the patch needs some fix.

I think the following line does not work as expected because the metacharacter `\R` cannot be put into `[]`. `[^\R]` is actually equivalent to `[^R]`.

|\{|(([^\R]*?))\}? # optional arguments
See the test result below.

```
irb(main):001:0> /[\n\r]/ =~ "n"
=> nil
irb(main):002:0> /[\n\r]/ =~ "n"
=> 0
irb(main):003:0> /[\n\r]/ =~ "R"
=> nil
```

#4 - 2020-05-26 02:39 - Yuichi HARADA
- File 33432-v2.patch added

Go MAEDA wrote:

I think the following line does not work as expected because the metacharacter \R cannot be put into [], \[^R\] is actually equivalent to \^[R].

[...]
See the test result below.

[...]
```

Thank you for your report.
I confirmed that the negative match /[\n\r]/ doesn't work with the line break code.
Fixed the patch.

#5 - 2020-06-02 15:09 - Go MAEDA
- Target version set to Candidate for next minor release

#6 - 2020-06-06 08:32 - Go MAEDA
- File 33432-test.patch added

Attaching test code for the patch.

#7 - 2020-06-09 07:58 - Go MAEDA
- Target version changed from Candidate for next minor release to 4.0.8
- Affected version changed from 4.1.1 to 4.0.0

Setting the target version to 4.0.8.

#8 - 2020-06-14 06:40 - Go MAEDA
- Target version changed from 4.0.8 to Candidate for next minor release
The actual cause of the problem is that the regular expression expects that there are two line terminators between "macroname[" and "]". The reason why there appears to be no problem when a line terminator is "\r\n" is that "\r" is parsed as the first line terminator and "\n" is parsed as the second line terminator.

So, even after applying the patch attachment:33432-v2.patch, the macro in the following text is not detected in the Preview tab.

```
collapse{
}
```

The code below can test it.

```
