

Redmine - Defect #33499

Issue filter "Subproject" does not work

2020-05-26 21:42 - Sebastian Paluch

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues filter	Estimated time:	0.00 hour
Target version:		Affected version:	4.1.0
Resolution:	Invalid		
Description			
Issue filter "Subproject" does not work. Looks like whatever is set, is ignored and issues from all subprojects are shown.			
Environment:			
Redmine version	4.1.0.stable		
Ruby version	2.5.7-p206 (2019-10-01) [x64-mingw32]		
Rails version	5.2.4.1		
Environment	production		
Database adapter	Mysql2		
Mailer queue	ActiveJob::QueueAdapters::AsyncAdapter		
Mailer delivery	smtp		
SCM:			
Subversion	1.11.1		
Git	2.19.1		
Filesystem			
Redmine plugins:			
no plugin installed			

History

#1 - 2020-05-26 22:42 - Mischa The Evil

- Status changed from New to Needs feedback

I am not able not reproduce this on 4.1.1 given what the feature actually provides¹. Also, the related code has test coverage. See QueryTest#test_filter_on_subprojects at source:/trunk/test/unit/query_test.rb@19786#L2406.

¹ the functionality of this filter might not exactly be what one expects, see eg. [#29596](#), [#8853](#), [#2512](#) and [#3952](#).

#2 - 2020-05-27 23:28 - Sebastian Paluch

Jean-Phillipe Lang said that "this is not a bug but a design choice" in [#2512#note-3](#).

OK, but this is very very intuitive and actually not useful behavior. If I would like to see issues that are from the project and a sub-project then I should have a possibility to use multi-select - select with Ctrl current project and desired sub-project. Currently the list holds only sub-projects and by default adds all issues from the project.

Imagine situation that the project has 1000 issues, then I have 10 sub-project. I would like to see issues only from two sub-project - I cannot - because issues from the two sub-projects will be overwhelmed by a 1000 issues from the project...

Since this is "desired" behavior", it seems that my issue should be changed to feature request.

#3 - 2020-05-28 15:39 - Holger Just

- Status changed from Needs feedback to Closed

- Resolution set to Invalid

If you want to display issues from only a specifically named subset of your projects, you can navigate to the global issue list at **Projects** -> **Issues**. There, you can select the projects you want to see issues from by using the **Project** filter.
