Target version:		Affected version:	4.1.0
Resolution:	Invalid		
Description			
<p>Hello,</p> <p>This is my first post here while I am using Redmine for years now, so I'm not really sure how/where to submit the request.</p> <p>I just updated Redmine from 3.2 to 4.1.</p> <p>I used to have video embedded directly next to attachment in tickets, after i added lines on application.js as explained in Patch #22112.</p> <p>After updating to 4.1 it's not working anymore. I tried adding the same lines but with no luck.</p> <p>I find it more convenient to have video directly there instead of going to the preview page.</p> <p>Is there any way to get it back ?</p> <p>Regards,</p>

- Status changed from New to Closed
- Resolution set to Invalid

Since the issue you reported is not a problem of Redmine core but your customization, I recommend posting in [Forums](#).
