Description Applying this patch (update-activity-layout.diff) will change the layout of the activity page as shown in the image below. <ul style="list-style-type: none">Dates are more emphasized and easier to findThe gap between the activity history has been slightly widened and a line has been added. I think the original layout is stuffed with letters and hard to read.

How about removing the horizontal lines between activity items and just adding padding-top: 10px? For me, the horizontal lines are a bit distracting.

I like the lines. Its important to know when day ends, such 'distraction' has merit.

#8 - 2020-07-13 04:33 - Mizuki ISHIKAWA

I like layouts that are clearly separated by lines
I think that the impression that there are many characters and it is difficult to see does not change just by adding padding.

Github and Gitlab activities are also separated by lines.
