Revision 20336 - 2020-11-12 01:15 - Go MAEDA

Fix that "View differences" buttons on RepositoriesController#diff page does not work due to r20147 (#33896, #33383).

Patch by Mizuki ISHIKAWA.

It seems to be caused by a change in jQuery that changed the value returned from position().top.
The problem seems to be fix, by replacing calculation using offset().top.

I think the problem is related to this change: <https://jquery.com/upgrade-guide/3.0/#offset>.

Takenori, thanks for looking into this, I've tested your patch and it fixes the problem, but looking deeper in the code and in the DOM, I think it's better to fix this by moving the "View differences" buttons outside the autoscroll block. Doing this, we fix another issue generated by the same cause, the buttons are no longer visible when you scroll to right, please see the attached screenshots.

What do you think about this fix?

Thanks Marius.

I think your patch is a better improvement.

I felt it was better as a DOM structure as well.

- File *fix-view-differences-buttons.patch* added

This change resolves the visual problem, but instead the "View differences" buttons no longer works.
The cause is that submit_tag has been moved out of the form tag.

The attached patch solves the problem by changing the position of the form tag.
