Redmine - Defect #33913
Input fields of the login form are too small in height on mobile
2020-08-27 08:31 - Bernhard Rohloff

Status: Closed
Priority: Normal
Assignee: Go MAEDA
Category: UI - Responsive
Target version: 4.2.0
Resolution: Fixed

Description
The height of the input fields in the responsive view are too small as their height gets overridden with 'auto' which has no effect if there's no content/text inside the fields.
My patch also removes the redundant width constraint and styling for tables in the login form as there aren't any.

<table>
<thead>
<tr>
<th>before</th>
<th>after</th>
</tr>
</thead>
<tbody>
<tr>
<td>login_form_before.png</td>
<td>login_form_after.png</td>
</tr>
</tbody>
</table>
