Description

Traker mapping when importing from trac with migrate_from_trac.rake import only if destination tracker is placed on the first place in the list of present trackers in redmine. F.e. I've got 5 trackers defined; I've added

TRACKER_TASK = Tracker.find_by_position(5)

and modified

TRACKER_MAPPING = {
'defect' => TRACKER_BUG,
'enhancement' => TRACKER_FEATURE,
'Task' => TRACKER_TASK,
'patch' =>TRACKER_FEATURE
}

Traker named task is present on the fifth position. And when importing process ends all tickets (issues) that match 'Task' keyword in trac are not imported at all. If i place 'Task' tracker on the fist position "Task" tickets import goes ok.

History

#1 - 2009-05-25 20:31 - Jean-Philippe Lang

- Tracker changed from Defect to Feature

#2 - 2009-05-25 20:31 - Jean-Philippe Lang

- Subject changed from Trackers mapping fails to Trac importer: customizable trackers mapping
