

Redmine - Defect #34068

Missing blank option on persisted records

2020-10-05 14:38 - Pavel Rosický

| | | | |
|--|----------------------------------|--------------------------|-----------|
| Status: | New | Start date: | |
| Priority: | Normal | Due date: | |
| Assignee: | | % Done: | 0% |
| Category: | Custom fields | Estimated time: | 0.00 hour |
| Target version: | Candidate for next major release | Affected version: | |
| Resolution: | | | |
| Description | | | |
| steps to simulate 1/ add a new CF type key-value 2/ set a default value and check a required attribute | | | |
| current behavior on existing issues without a CF value, there's always the FIRST value prefilled automatically. It's easy to overlook there was any change. | | | |
| desired behavior in this case, there should be a blank value and a user should be prompt to select something. | | | |
| the behavior should be kept for new tasks only where the blank value on required fields makes no sense | | | |
| a patch attached | | | |
