Description

String#match? was added in Ruby 2.4. you can replace =~ with faster String#match? or Regexp#match? when MatchData generated by `=~` is not necessary.

The attached patch changes such =~ to mach?. I generated the patch with the following commands.

```
sed -i '' 's/TargetRubyVersion: 2.3/TargetRubyVersion: 2.4/'.rubocop.yml
bundle exec rubocop --only Performance/RegexpMatch -a
```
