Description

Hi!

I have noticed that in tagged version 0.8.4 are not translated some strings in Slovak as well as in Czech LP. I`m continuosly translating LP for Trunk, so I have thought that translated strings in trunk will be "back-ported" into 0.8.x version. Obviously it is not like that. So I have done a back-port from Trunk back to 0.8.x for mentioned languages.
But the question is - could be tagged version also updated? If yes - please add(update with) attached files.
