

Redmine - Defect #34185

Trackers of subprojects are not displayed in the Issue summary page

<b>Resolution:</b>	Fixed		
<b>Description</b>			
The tracker box in the Issue summary page (projects/:id/issues/report, projects/:id/issues/report/tracker) shows the trackers used only for that project.			
I think if "Display subprojects issues on main projects by default" setting is enabled, you should also display trackers that are used only in subprojects.
