

Redmine - Defect #34214

Can't verify CSRF token authenticity

2020-11-02 18:47 - Adriano Bellia

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Ruby support	Estimated time:	0.00 hour
Target version:		Affected version:	4.0.3
Resolution:			
Description			
<p>Hi,</p> <p>I'm embeeding a Redmine page inside a Sharepoint iframe.</p> <p>It has always worked in the last months, from one month, more or less, when I try to login in Redmine through this page I receive the "Can't verify CSRF token authenticity" error. From outside everything works.</p> <p>I tried adding the self.allow_forgery_protection = false in the application.rb file, but now, just in the embeeded login page, after putting the credentials I return to the login page. In the redmine log it tells that I'm succesfully loggin in but nothing happens.</p> <p>Any suggestion ?</p> <p>Environment:</p> <p>Redmine version 4.0.3.stable</p> <p>Ruby version 2.5.5-p157 (2019-03-15) [x86_64-linux]</p> <p>Rails version 5.2.2.1</p> <p>Environment production</p> <p>Database adapter Mysql2</p> <p>Mailer queue ActiveJob::QueueAdapters::AsyncAdapter</p> <p>Mailer delivery smtp</p> <p>SCM:</p> <p>Subversion 1.12.0</p> <p>Git 2.19.1</p> <p>Filesystem</p> <p>Redmine plugins:</p> <p>nuova_issue 0.0.2</p> <p>redmine_add_ldap_user_to_group 0.1.0</p> <p>redmine_auto_assign_group 0.1.1</p> <p>redmine_editauthor 0.11.0</p> <p>view_customize 2.5.0</p>			

History

#1 - 2020-11-12 14:46 - Adriano Bellia

- Status changed from New to Resolved

For now in my environment it seems resolved.

What I did is changing the called URL in the embeeding page. They are in the same domain but I was calling just the site name and the browser was giving error on the certificate
