

## Redmine - Feature #34288

### Show tree path of project when searching in searchable project selectbox

2020-11-19 13:02 - Daniel Duton

<b>Target version:</b>			
<b>Resolution:</b>			
<b>Description</b> We have multiple projects with the same name but with another path in the project tree.  When searching for one of these projects, we get a list we x times the name, but no info about the path, where these projects are located.  My idea is to show the path with a smaller fontsize above each project, when searching.
