Description			
<p>Sometimes we want to create a custom field with settings similar setting to an existing one. For example, when you want to create multiple custom fields for the same project and tracker.</p> <p>In such cases, the ability to copy custom fields similar to those already implemented for roles (#9258) and trackers (#34258) can save you a lot of time and effort.</p> <p>copy-custom-field.png</p>
