Target version:			
Resolution:	Fixed		
Description			
Administration > Settings > Authentication > Allow OpenID login and registration is disabled if the ruby-openid gem isn't installed.			
There should be some sort of notification or documentation that the gem is required.

I've at least added some documentation about it [here](#) and [here](#).

[Eric Hulser](#):

Do we (still) need this as a notification *inside* Redmine settings-view also (as a description or so)?

Regards,

Mischa.

#2 - 2009-06-14 10:41 - Jean-Philippe Lang

- Tracker changed from Defect to Feature

#3 - 2009-06-30 01:24 - Eric Davis

- % Done changed from 0 to 100

Mischa, that will work. One problem I heard about in IRC a few times was that some systems have an older ruby-openid gem installed, which isn't compatible. I've updated the wiki page to say version 2 is required.
