Description

Currently, there is no way to see the latest posts in the forum module. The only way is to look at the activity page.

I suggest displaying "Latest messages" on the forum page, like "Latest revisions" on the repository page. This allows users to easily check recent posts and makes the forum more user-friendly.

The screenshot shows the Redmine interface for the 'eCookbook' project. The 'Forums' tab is active, displaying a table of forum topics. Below the table, a 'Latest messages' section is highlighted with a pink border, showing a list of recent posts with columns for Forum, Subject, Content, Author, and Created.

Forum	Topics	Messages	Last message

+1.

It is expected that communication will be more active, with more opportunities to display new messages.

I made a patch to display the latest messages and posted it.
