<b>Description</b> <a href="#">#33383#note-3</a> :  Because the update can break some plugins, I propose the following plan for this update:  1. Commit the current patches 2. Keep this ticket open for one or two months in order to have time to find potential problems generated by the update 3. After this period, commit <a href="#">jQuery Migrate</a> 4. In Redmine <a href="#">5.0.0</a> , remove jQuery Migrate and keep only the latest jQuery version.
