Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Gems support	Estimated time:	0.00 hour
Target version:		Affected version:	4.1.1
Resolution:	Invalid		
Description			
after update last svn update i cant do bundel update Could not verify the SSL certificate for https://rubygems.org/ . There is a chance you are experiencing a man-in-the-middle attack, but most likely your system doesn't have the CA certificates needed for verification. For information about OpenSSL certificates, see http://bit.ly/ruby-ssl . To connect without using SSL, edit your Gemfile sources and change 'https' to 'http'.

- Resolution set to Invalid

RubyGems is not part of Redmine but a third party thing, so unfortunately there is nothing we can do to help you with the troubles that are occurring in your system.

Perhaps updating root certificates in your system will fix the issue.
