<b>Description</b>	
<p>It would be nice to be able to add fields (standard or custom) in the <b>issue attributes</b> of the notification email (like the parent task as it have be done here : #34302)</p> <p>The idea, in my case, is to add a user custom fields (e.g. Department or Agency of the user that submit the issue) to add more context informations of the issue</p>
