Redmine - Defect #3454

Mercurial Repository Browsing Disappearing

2009-06-06 11:51 - Carlo Camerino

Status:	Closed		**Start date:**	2009-06-06
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	SCM		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Cant reproduce		**Affected version:**	

Description

Hi,
My mercurial repository is always disappearing after I first look at it. Initially after configuration it is still there, but when I try to access it again I don't see it anymore. You can trake a look at the screen shots for reference.

I initially configure it then I logout, then login again and when I look it's no longer there.
It doesn't happen on version 0.8.4 though.

Do you login with the same account?

yes i did,
i think i was able to fix it via this

i think it's not a problem with redmine but rather with my mercurial configuration.
i googled around and checked and i got this. i think this is needed for redmine and mercurial configuration to set trusted users.

i had to set trusted and untrusted

```
~/.hgrc:

[trusted]
users = foo, bar, baz
groups = fred, barney

(use "*" if you want to trust all users/groups)
```

if i don't do this by the way i get errors telling me that the entry revision or url could not be found.
it just works inconsistently. but when i applied this it seemed to work all of the time.

#5 - 2011-02-04 13:16 - Toshi MARUYAMA

- Assignee set to Toshi MARUYAMA

#6 - 2011-02-04 13:18 - Toshi MARUYAMA

Reference.
http://www.selenic.com/mercurial/hgrc.5.html#trusted

#7 - 2011-02-04 13:30 - Toshi MARUYAMA

- Status changed from New to Closed

- Assignee deleted (Toshi MARUYAMA)

- Resolution set to Cant reproduce

I can't reproduce.
Redmine reads only Mercurial repository and does not need to write permission.

trusted section is for .hg/hgrc, not for ~/.hgrc.

#8 - 2011-02-05 09:07 - Toshi MARUYAMA

- Subject changed from Mercuirial Repository Browsing Disappearing to Mercurial Repository Browsing Disappearing

I fixed subject typo.
