

Redmine - Feature #34549

Add keyboard shortcuts for wiki toolbar buttons

2021-01-02 23:18 - Marius BALTEANU

Status: Closed	Start date:								
Priority: Normal	Due date:								
Assignee: Go MAEDA	% Done: 0%								
Category: UI	Estimated time: 0.00 hour								
Target version: 4.2.0									
Resolution: Fixed									
Description									
Add keyboard shortcuts for the following buttons from wiki toolbar:									
<table border="1"><thead><tr><th>Action</th><th>Keyboard shortcut</th></tr></thead><tbody><tr><td>Add bold</td><td>Ctrl/⌘ + b</td></tr><tr><td>Add italic</td><td>Ctrl/⌘ + i</td></tr><tr><td>Add underline</td><td>Ctrl/⌘ + u</td></tr></tbody></table>		Action	Keyboard shortcut	Add bold	Ctrl/⌘ + b	Add italic	Ctrl/⌘ + i	Add underline	Ctrl/⌘ + u
Action	Keyboard shortcut								
Add bold	Ctrl/⌘ + b								
Add italic	Ctrl/⌘ + i								
Add underline	Ctrl/⌘ + u								
⌘ : should work only on osx Ctrl: should work only on windows/linux.									
Any other proposals are welcome!

Revision 20729 - 2021-01-26 07:50 - Go MAEDA

Add keyboard shortcuts for bold, italic and underline buttons (#34549).

Patch by Marius BALTEANU.

Revision 20743 - 2021-02-10 01:49 - Go MAEDA

Internationalize button titles (#34549).

Patch by Go MAEDA.

History

#1 - 2021-01-02 23:24 - Marius BALTEANU

- Subject changed from Add keyboard shortcuts for wiki toolbar to Add keyboard shortcuts for wiki toolbar buttons

#2 - 2021-01-02 23:33 - Marius BALTEANU

- Description updated

#3 - 2021-01-03 05:05 - Go MAEDA

I like the feature. Since the key combination ⌘ + b is available in so many apps, I sometimes mistakenly use the key combination in Redmine.

1/5

| *Ctrl: should work only on windows/linux.*

It is really important. Ctrl + B is already used as a shortcut key of the left arrow key in macOS.

#4 - 2021-01-06 23:17 - Marius BALTEANU

- *File 0001-Add-keyboard-shortcuts-for-bold-italic-and-underline.patch added*

Here is an almost ready version of the patch for testing purposes. Must be applied on top of #30459.

I need to test the feature on multiple browsers/devices, add system tests and improve the code if possible.

- *Category set to UI*

- *Target version changed from Candidate for next major release to 4.2.0*

I tried out the patch and found it works fine and is quite useful.

Setting the target version to 4.2.0.

#12 - 2021-01-22 09:50 - Go MAEDA

Thank you for writing the patch but I found some tests fail on macOS. This is because the tests use a control key. As written in the description, control key does not work on macOS.

#13 - 2021-01-25 01:24 - Marius BALTEANU

- File 0001-Add-keyboard-shortcuts-for-bold-italic-and-underline_v2.patch added

Thanks Go Maeda for catching this issue, I had in mind only to pass on Linux instances (I've docker on my local env). Updated a new version of the patch that should pass on OSX, but I didn't test it, please let me know how it goes.

The new version adds the following changes:

1. Adds a new method `osx?` on `lib/platform` that returns true if `RUBY_PLATFORM` is `darwin`.
2. In the tests, the modifier key is returned based on `osx?`.

#14 - 2021-01-25 06:30 - Go MAEDA

Thank you, it now passes all tests also on macOS. I will commit the patch soon.

#15 - 2021-01-26 07:51 - Go MAEDA

- Status changed from *New* to *Closed*
- Assignee set to *Go MAEDA*
- Resolution set to *Fixed*

Committed the patch. Thank you.

#16 - 2021-02-04 05:50 - Go MAEDA

- File `tooltips-are-untranslated.png` added
- Status changed from *Closed* to *Reopened*

After `r20729`, tooltips for the buttons always displaying in English regardless of the current user's Language.

`tooltips-are-untranslated.png`

The following code fixes the issue.

```
diff --git a/public/javascripts/jstoolbar/jstoolbar.js b/public/javascripts/jstoolbar/jstoolbar.js
