

Redmine - Defect #34594

Redmine 3.3.2 redirect after creating issue broke

2021-01-14 19:25 - Łukasz Zaremba

Status:	Closed	Start date:

Target version:		Affected version:	
Resolution:	Duplicate		

Description

Problem

Redmine 3.3.2 in [r16317](#) changed the behavior in backwards incompatible manner.

Before [r16317](#) - after creating an issue, user was redirected to the issue that he created.

This was very useful because after working on a task with remote team members - you could CTRL+C/CTRL+V the link to other people and they could login their hours.

After [r16317](#) - we are redirected to parent task and Redmine so far does not provide to alter this behavior in Administrative section.

This breaks our workflow because we work on long tree structures and finding "last" task is very inconvenient.

Temporary workaround

I did manage to find temporary workaround by commenting `back_url` hidden form field when creating the issue but I had to modify the source code - which I prefer not to do.

See: [revert-redirect-to-parent-issue-after-adding-subtask-r16317.patch](#)

Redmine version details

Environment:

Redmine version	4.1.1.stable.19939
Ruby version	2.5.5-p157 (2019-03-15) [x86_64-linux-gnu]
Rails version	5.2.4.2
Environment	production
Database adapter	Mysql2
Mailer queue	ActiveJob::QueueAdapters::AsyncAdapter
Mailer delivery	sendmail

SCM:

Subversion	1.10.4
Git	2.20.1
Filesystem	

Redmine plugins:
no plugin installed

This breaks our workflow because we work on long tree structures and finding "last" task is very inconvenient.

Another option is to copy the link or open the new subtask from the notification message that appears on the parent task after you've been redirected:

`subtask_message.png`

Anyway, I've proposed a solution to [#29076](#).
