1.0.0
1.0.6
0.7.5
0.9.2

Please try without plugins. This is most-likely caused by one (or more) of them being incompatible in some way. In case the issue persists I'd suggest to provide some logs that shows this behavior happening.

#2 - 2021-02-22 09:55 - Go MAEDA

According to <u>#7414#note-12</u>, the behavior that the author of an issue can see the issue is considered to be expected behavior.

Copied from <u>#7414#note-12</u>:

A new issue visibility level is available on roles:

• All non private issues => user will see all non private issues and private issues that were created by him or are assigned to him

#3 - 2021-07-17 10:11 - Go MAEDA

- Status changed from Needs feedback to Closed
- Resolution set to Wont fix

Closing this issue because it is the expected behavior as I wrote in #34673#note-2.

Thanks for this clarification. I was bitten by the fact that this wasn't included on <u>RedmineRoles</u> (which I've fixed now) and that it isn't something that is properly reflected by the property value ('All non private issues').
