Rendering /home/redmine/webroot/public/500.html (500 Internal Server Error)

I think this doesn't occur on all repositories, just specific ones.

I am using trunk version of redmine with subversion. This subversion has a few svn:external svns defined.

Plugins i have installed :

- ezFAQ plugin
- code review plugin
- graphs plugin
- my widgets
- stuff to do
- schedules

This used to work but it suddenly stopped a while ago (a month or so...)
