Target version:	4.2.0		
Resolution:	Fixed		
Description <p>In #8160, we introduced the ability to filter by specific watchers (rather than just "me"). However, due to the permission check inside the Query#watcher_values method, this capability was only available inside a project. In the global issues view, the filter still only offered "me".</p> <p>The attached patch against current trunk (r20742) fixes this behavior to also offer all visible watchers on the global issues view. The patch is a git patch which can be applied with</p> <pre>patch -p1 < 0001-Allow-to-use-watch_by-filter-in-the-global-issues-li.patch</pre>
