

Redmine - Defect #34709

No Images in PDF export of issue list (with option show description)

2021-02-11 19:22 - Gregor Hiltmann

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	PDF export	Estimated time:	0.00 hour
Target version:		Affected version:	4.1.1
Resolution:	Fixed		

Description

This error is shown in current release 4.1.1 and the version used by redmine.org.

Steps to reproduce:

1. Create a new issue, upload an attachment - e.g. "example.png" (like in this issue)
2. Link the attachment in the description like this:

3. Create the issue, show the issue list
4. Click on options, check show description and apply
5. Now the issue list images are shown
6. Click on (also available in) PDF below the list

Result:

The PDF doesn't contain the image. Instead the filename ist shown. In production log we see an error (something like filename is missing) -> filename object is NIL.

How to repair - simply do this:

1. open the file lib/redmine/export/pdf/issues_pdf_helper.rb
2. search for:

```
pdf.RDMwriteHTMLCell(0, 5, '', '', text, [], "LRB")
```

3. replace with:

```
pdf.RDMwriteHTMLCell(0, 5, '', '', text, issue.attachments, "LRB")
```
