Description			
<p>Hi,</p> <p>I would like to update my redmine 4.0.6 version to 4.1.x version. The most important feature that i would like to use is the gant expand/collapse.</p> <p>I red the new (4.1.x) version knew this function.</p> <p>Could you send me a step by step descripiton to the update method?</p> <p>The redmine is on an Ubuntu 20.04 LTS with ruby 2.7.0 version.</p> <p>it can also be a solution, install a new operating system with new redmine (4.1.x) and after migrate the database.</p> <p>Please send me a step by step description the lighter and/or better solution.</p> <p>Thank you!</p>

Hi,

there is an article about upgrading Redmine in the wiki: [RedmineUpgrade](#)

This is the issue tracker for development related things only, so please use the forums for further questions and support.
Thank you.
