Description	
Hi,	
I would like to update my redmine 4.0.6 version to 4.1.x version. The most important feature that i would like to use is the gant expand/collapse.	
I red the new (4.1.x) version knew this function.	
Could you send me a step by step descripiton to the update method?	
The redmine is on an Ubuntu 20.04 LTS with ruby 2.7.0 version.	
it can also be a solution, install a new operating system with new redmine (4.1.x) and after migrate the database.	
Please send me a step by step description the lighter and/or better solution.	
Thank you!

Hi,

there is an article about upgrading Redmine in the wiki: [RedmineUpgrade](#)

This is the issue tracker for development related things only, so please use the forums for further questions and support.
Thank you.
