Precedes Redmine - Patch #39751: Additional translation for Tamil language Closed			

Associated revisions

Revision 22357 - 2023-10-21 02:18 - Go MAEDA

Add Tamil language support (#34924).

Patch by Dhanasingh Krishnapandian.

Revision 22378 - 2023-10-25 10:05 - Go MAEDA

Remove unused keys from the Tamil translation file (#34924).

History

#1 - 2022-01-16 07:24 - Go MAEDA

- Target version set to Candidate for next major release

Thank you for translating to Tamil.

According to <https://www.ethnologue.com/guides/ethnologue200>, Tamil is the 17th most spoken language in the world. I think there is no reason not to merge Dhanasingh Krishnapandian's effort to the core.

#2 - 2022-06-24 09:55 - Go MAEDA

- Target version changed from Candidate for next major release to 5.1.0

Setting the target version to 5.1.0.

#3 - 2023-10-21 02:19 - Go MAEDA

- Tracker changed from Patch to Feature

- Subject changed from Tamil India language files to Add Tamil language support

- Resolution set to Fixed

Committed the patch in [r22357](#). Thank you for your contribution.

#4 - 2023-10-21 02:33 - Go MAEDA

- Status changed from New to Closed

- Assignee set to Go MAEDA

#5 - 2023-10-21 05:20 - Mischa The Evil

[Dhanasingh Krishnapandian](#): Thanks for sharing your effort. Now it's committed, can you also translate:

- the additional `common_mark` help files added with [#32424](#) (source:/trunk/public/help/en/wiki_syntax_common_mark.html & source:/trunk/public/help/en/wiki_syntax_detailed_common_mark.html);
- the keys added to Redmine after your original contribution (they are added by [Go MAEDA](#) and currently filled with the English default values;

starting from line 1316 in [source:/trunk/config/locales/ta-IN.yml@22358#L1316](#) and line 15 in [source:/trunk/public/javascripts/jstoolbar/lang/jstoolbar-ta-in.js@22358#L15](#)?

Go MAEDA wrote in [#note-1](#):

[...] I think there is no reason not to merge Dhanasingh Krishnapandian's effort to the core.

Well, in general the problem lies in the maintenance of the additions. The current actual amount of supported languages (besides English [en]) with a percentage-translated of 100% is smaller than five, I think (even getting such numbers requires lots of time-consuming manual investigation). If this is something deemed to be tackled, we should really look into a (more sophisticated/automated) general solution for managing i18n than we currently have. But this is something off-topic and should be discussed in a separate issue.
