Do you have the secret token generated? It should be in config/initializers/secret_token.rb. If not, you can run bundle exec rake generate_secret_token.

#2 - 2021-04-03 03:09 - ChunChang (Nagaharu) Lo

Hi,

In fact, I do have a secret_token.rb file.
It was dated back to 2012.
Should I run the command, bundle exec rake generate_secret_token, again?

```
[redmine@centos8 redmine]$ pwd
/var/www/html/redmine
[redmine@centos8 redmine]$ ls -l config/initializers/secret_token.rb
-rw-r--r--. 1 redmine redmine 671 Apr 26  2012 config/initializers/secret_token.rb
```

You are migrating in 'development' environment. Is it this what you want? May be you have to use 'production' environment (if you are upgrading a production installation).

- Status changed from New to Resolved

sorry for the late reply.

i removed secret_token.rb and regenerated it, then the error disappeared.

thanks for your help.
