

Redmine - Feature #3506

Need ability to restrict which role can update/select the target version when updating or submitting an issue

2009-06-17 17:48 - Gabriel Baez

Status:	New	Start date:	2009-06-17
Priority:	High	Due date:

Target version:			
Resolution:			
Description			
<p>I was looking through the roles/permission section and there is not an option to restrict the selection or update of the target version field.</p> <p>This is an option we need in order to prevent users who are not project managers from sticking issues into the road map.</p>

- Assignee set to Jean-Philippe Lang

#2 - 2009-07-16 21:14 - Andy McKay

I second this. The ability to restrict certain fields to certain user types would be invaluable... esp. when dealing with the target version.

+1

#4 - 2013-03-18 16:47 - Dipan Mehta

The combination of #703 (available under version 2.1.0) and #12005 (planned) together will solve this.
