Category:	Code cleanup/refactoring		**Estimated time:**	0.00 hour
Target version:	5.0.0			

Description

extracted from the oauth patch set in [#24808](#)

this is the second patch from the series, which enhances the menu manager so it generates proper urls when using controllers nested in a module namespace (i.e., Doorkeeper::FooController).

Associated revisions

Revision 20945 - 2021-04-15 03:03 - Go MAEDA

Prevent hash type URLs from being namespaced in MenuManager (#35076).

Patch by Jan Schulz-Hofen.
