<b>Category:</b>	Accounts / authentication	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	4.2.1	<b>Affected version:</b>	
<b>Resolution:</b>	Fixed		
<b>Description</b> The issue was originally reported in <a href="#">#35086</a> .  Suppose a Redmine instance that projects are public and can be accessed without authentication. You were logged in to Redmine, and one day the admin set two-factor authentication to be required.  But suppose that you want to access the Redmine as an anonymous user without enabling two-factor authentication. So you will try to sign out, but when you click the "Sign out" link, you will get a page asking you to enable two-factor authentication and you cannot sign out. Therefore, the only way for you to access the Redmine as an anonymous user is to delete a cookie or use a different browser.
