History

#1 - 2021-05-02 03:38 - ryou soda

Label name "Long-Text (Wide)" is not displayed

#2 - 2021-05-03 09:02 - Marius BĂLTEANU

- Status changed from New to Closed

- Resolution set to Invalid

This is the expected behaviour, custom fields with empty value are not rendered regardless their type (long text or not). Please reopen if you consider this a feature request, but in my opinion, displaying all the custom fields by default will eat a lot of space without any benefit.

- File *long-text_not-wide.jpg* added

I understand the policy of not issuing it if it is empty.

If so, is it an unintended behavior that is displayed when it is not "Full width layout"?

Sorry, I posted a misinformation in my previous note.

I checked again now and all custom fields are shown in issue detail page except full width custom fields which are not rendered when the value is blank. You can see [r16257](#) from [#21705](#) for more details.

Considering this new and correct information, do you want to keep this open and track it as a feature request?

I understand that the label will be hidden only in the case of "Full width layout", so it is OK to close it.
