<b>Description</b>	
Hello there,	
it would be very helpful if we would be able to change the "No Match Found!" message that is included via the third party library tribute.js. I could hardcode it into the file itself, but that just seems odd.	
Best regards

- File patch1.diff added

In the "tribute.js", the "noMatchTemplate" property for each entry in the "collection" is ineffective. (README is confusing. I raise an issue if I can.) The "noMatchTemplate" specified separately from the "collection" is effective.

An empty string is effective if not want to display a message when there is no match. No function is needed. (again, README is confusing.)
