<b>Description</b>			
<p>Dear all,</p> <p>is there a plugin working for latest redmine releases enabling us to create filters in redmine and then sending emails in case of new entries to these?</p> <p>e.g. we have several custom fields we use. We create filters on these. If a new ticket falls into this filter, we'd like to receive email notifications.</p> <p>There has been the issue reminder plugin, but it seems it's not working in latest versions anymore, so that we now search for a plugin filling our needs.</p> <p>Thx Rgds Benjamin</p>
