Redmine - Patch #35372

Better presentation for 2FA recovery codes

2021-06-08 11:32 - Felix Schäfer

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:	Go MAEDA		**% Done:**	0%
Category:	Accounts / authentication		**Estimated time:**	0.00 hour
Target version:	4.2.2			

Description

The following patch makes the recovery codes a little bigger and avoids using `float` to present them in 2 columns. It also improves how some browsers will copy the list, before some browsers would copy the whole list as a long string of all recovery keys concatenated without spaces between individual keys:

```
XXXX XXXX XXXXXXXX XXXX XXXXXXXX XXXX XXXX…
```

After the change the browser understands the list better and copies it as a newline-separated list of keys:

```
XXXX XXXX XXXX
XXXX XXXX XXXX
XXXX XXXX XXXX
…
```

The new presentation is also more responsive and will reflow correctly on narrow screens.

- Category changed from UI to Accounts / authentication

- Status changed from New to Closed

- Assignee set to Go MAEDA

Committed the patch. Thank you.

#5 - 2021-06-14 23:12 - Marius BĂLTEANU

Go Maeda, do you see any problem if we deliver this in 4.2.2? Being an improvement of a new feature of 4.2.0.

#6 - 2021-06-15 01:34 - Go MAEDA

- Status changed from Closed to Resolved

- Target version changed from 5.0.0 to 4.2.2

I didn't backport this fix to 4.2-stable because I thought very few people are currently bothered by the issue, but I think it is OK to include it in 4.2.2.
