Resolution:		**Affected version:**	4.2.1

Description

In order to manage our Implementation Project better, I created a Project X. In order to better organize our task I also created a tracker for Project.

The trackers I have are:

- Project
- Programming Request
- Support
- Bug
- Training

The hierarchy of the project is as follow :

- Project X
    - Project (Tracker) = Project Implementation
        - Programming request 1 - Precedes (Support 2)
        - Support 2 Precedes (Support 3)
        - Support 3

When I make a copy of the Project Implementation, the subtasks Programming request 1, Support 2, Support 3 do copy however the Precedes values does not copy over.

Anyone else has this issue?

Ideally what I would love to do is copy the Project Implementation as a template and push the dates based on the Project Implementation for other projects moving forward
