History

#1 - 2021-06-14 04:57 - Yuichi HARADA

The models of Activity are registered in source:trunk/lib/redmine.rb#L420, but some fixtures were not declared in ActivitiesControllerTest.

```
Redmine::Activity.map do |activity|
  activity.register :issues, :class_name => %w(Issue Journal)
  activity.register :changesets
  activity.register :news
  activity.register :documents, :class_name => %w(Document Attachment)
  activity.register :files, :class_name => 'Attachment'
  activity.register :wiki_edits, :class_name => 'WikiContentVersion', :default => false
```

```
  activity.register :messages, :default => false
  activity.register :time_entries, :default => false
end
```
