

Redmine - Feature #35432

Git: View annotation prior to the change

2021-06-22 10:01 - Go MAEDA

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Go MAEDA	% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:	5.1.0		
Resolution:	Fixed		

Description

The "Blame" view of GitHub and Gitlab has a feature called "View blame prior to this change". With the feature, you can easily jump to an older change of the line.

I think it would be useful if Redmine also has the feature. Currently, it requires some manual steps to see older changes in the "Annotate" view of Redmine.

--	-----

Associated revisions

Revision 22215 - 2023-04-29 08:59 - Go MAEDA

Code cleanup of RepositoriesController#annotate (#35432).

Revision 22216 - 2023-04-29 11:49 - Go MAEDA

Display color bars on the left side of `td.line-code` instead of on the right side of `td.author` in the annotate view (#35432).

Revision 22217 - 2023-04-30 06:00 - Go MAEDA

Add "View annotation prior to this change" button in the annotate view of Git (#35432).

Patch by Takenori TAKAKI.

Revision 22218 - 2023-04-30 06:13 - Go MAEDA

Update locales (#35432).

History

#1 - 2021-07-08 10:07 - Takenori TAKAKI

- File 35432.patch added

2024-04-19

1/3

- File `disp_link_to_prior.png` added

I made a patch to display the link to prior revision.
The patch adds a link to "Annotate" view as follows

`disp_link_to_prior.png`

#2 - 2021-07-24 09:58 - Go MAEDA

- Target version set to Candidate for next major release

#3 - 2021-08-22 11:01 - Mischa The Evil

- Subject changed from View annotate prior to the change to Git: View annotate prior to the change

+1 This is a real handy feature when browsing (Git) repositories a lot. Given the usability of this change I wonder if this is something that could be implemented (easily) for other SCMs (Hg, SVN, ...) too?!

#4 - 2021-10-15 03:40 - Go MAEDA

This feature is easy to implement in the Git adapter because ``git blame -p`` outputs the previous commit for the line, as shown in the "previous" like of the following sample.

However, ``blame`` / ``annotate`` subcommand of other SCMs such as subversion doesn't give the information of the previous change, so we have to find another way to get the previous change.

Since there are so many Git users these days, I think it is a good idea only for Git as a first step.

#5 - 2022-07-03 04:46 - Go MAEDA

- Target version changed from Candidate for next major release to 5.1.0

Setting the target version to 5.1.0.

#6 - 2022-09-03 09:36 - Go MAEDA

- File `0001-Git-View-annotate-prior-to-the-change.patch` added

Updated the patch for the current trunk [r21799](#).

#7 - 2023-04-23 09:04 - Go MAEDA

- File `0001-Code-cleanup-of-RepositoriesController-annotate.patch` added

- File 0002-Git-View-annotate-prior-to-the-change.patch added

I have updated the patch not to hard-code Repository::Git constant in app/views/repositories/annotate.html.erb.

#8 - 2023-04-30 06:10 - Go MAEDA

- File clipboard-202304301308-zmlp9.png added
- Status changed from New to Closed
- Assignee set to Go MAEDA
- Resolution set to Fixed

Committed the patch in [r22217](#) with slight modifications. Thank you for your contribution.

The annotate view of a Git repository now has "View annotation prior to this change" buttons.

However, `blame` / `annotate` subcommand of other SCMs such as subversion doesn't give the information of the previous change, so we have to find another way to get the previous change.

You don't really need to know revision of previous change for SVN. Since revisions in SVN are sequential numbers, you only need to decrease number of revision of given change and show annotations for this version. For example to see annotations prior [r22231](#) for [this file](#)

```
22 5859 tmaruyama :rev => nil},
23 :method => :get) do %>
24 4613 tmaruyama <%= text_field_tag 'rev', @rev, :size => 8 %>
25 22231 maeda <%= submit_tag l(:button_view), :name => nil %>
26 jplang <% end %>
27 333 jplang </div>
28
```

you need to show annotations for revision 22230:
<https://www.redmine.org/projects/redmine/repository/svn/revisions/22230/annotate/trunk/app/views/repositories/revision.html.erb>

Thank you for your suggestion. I have opened [#38526](#) to implement this feature for Subversion.
