

Redmine - Feature #35544

Define Workflow per Project

2021-07-08 06:10 - Gayathri Jayakumar

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Project settings	Estimated time:	0.00 hour
Target version:			
Resolution:			
Description			
We are using Redmine for our project management with Agile Plugin.			
I am unable to define workflows for multiple projects. I have created status and the workflow is also defined.			
Let's say for Project1 the workflow is "InDiscussion->InDevelopment->InQA->ReadyForDeployment"			
I would like to create a workflow for Project2 with workflow "Start->Approve->Done"			
Let me know how to achieve this.			
Environment:			
Redmine version	4.1.1.stable		
Ruby version	2.6.5-p114 (2019-10-01) [x86_64-linux]		
Rails version	5.2.4.2		
Environment	production		
Database adapter	Mysql2		
Mailer queue	ActiveJob::QueueAdapters::AsyncAdapter		
Mailer delivery	smtp		
SCM:			
Subversion	1.7.14		
Git	1.8.3.1		
Filesystem			
Redmine plugins:			
redmine_agile	1.5.4		

History

#1 - 2021-07-08 13:47 - Bernhard Rohloff

- Status changed from New to Closed

In Redmine the central part which defines the workflow of an issue is the tracker. It's the same for every project. If you want a different workflow you will have to create another tracker for that. It's very likely that if you have different workflows in different projects, your kind of issue is also a different. So it makes sense to track different types of work separately.

I'm closing this issue by now, as I think this is more a support request than a feature request and therefore it should be placed in the forums as described in [Submissions](#).

#2 - 2022-12-13 12:22 - Dimitar (RedmineUP)

Dear **Gayathri**,

This is Dimitar from the **RedmineUP** Support Team.

Could you please contact our support team at support@redmineup.com? And our support engineers will help you in relation to your request.

We look forward to hearing from you.

Best Regards,

Dimitar from the RedmineUP Support Team
