

## Redmine - Defect #35545

### Fix css class assignment in issue custom field rendering in show view

2021-07-08 17:24 - Liane Hampe

<b>Status:</b> New	<b>Start date:</b>
<b>Priority:</b> Normal	<b>Due date:</b>
<b>Assignee:</b>	<b>% Done:</b> 0%
<b>Category:</b> Issues	<b>Estimated time:</b> 0.00 hour
<b>Target version:</b>	<b>Affected version:</b> 4.2.1
<b>Resolution:</b>	
<b>Description</b>	
<p>Rendering the issue custom fields in the show view is done by the class IssueFieldsRow, which can be found in issues_helper.rb.</p> <p>The method IssueFieldRow#to_html has an error because the class 'splitcontentright' will never be assigned.</p> <p>This patch fixes this error by modifying the class in the respective content_tag of the helper method. Thus, it is a one liner.</p>

##### #2 - 2021-07-13 23:57 - Go MAEDA

- File 35545-layout-issue.png added

The suggested change causes a layout issue. See the screenshot below.

35545-layout-issue.png

##### #3 - 2021-07-14 09:37 - Liane Hampe

- File 35545-layout-issue-flex-css.png added

Hi Go MAEDA,

Thank you for this important information.

I have fixed it with some more css:

Old styles:

```
.splitcontent {overflow: auto; display: flex; flex-wrap: wrap}
```

```
.splitcontentleft {flex: 1; margin-right: 5px;}
```

```
.splitcontentright {flex: 1; margin-left: 5px;}
```

New styles:

```
.splitcontent {overflow: auto; display: flex; flex-wrap: wrap; justify-content: space-between}
```

```
.splitcontentleft, .splitcontentright {width: 49.5%}
```

This is how it looks like now:

35545-layout-issue-flex-css.png

It also looks nice on the project overview page where the same css classes are used.

Best Regards

Liane
