Description

This is extracted from #34643.

- **1. Remove 'edit' action from :manage_wiki permission definition in Redmine::AccessControl.**
  Wikis#edit is removed by r17018.
- **2. Redirect_to project_path after WikisController#destroy.**
  - Project settings 'wiki' tab is removed by r16917 & r17017.
  - This action is executed outside the project settings scope after r16916, thus we can better redirect to project_path.
- **3. Set :wiki menu_item for WikisController#destroy.**
  This action is executed inside the project wiki scope after r16916, thus we can better set the menu_item accordingly.

Thanks for handling this. Now that I've had a second look at this though, I noticed that the remaining 'edit' JavaScript view (source:/trunk/app/views/wikis/edit.js.erb) is obsolete too and that it can be removed. Can this be handled via this issue (without a patch from me) too?
