Nice! Thanks for your work. Are you willing to take a look at the detailed versions (source:/trunk/public/help/de/wiki_syntax_detailed_markdown.html and source:/trunk/public/help/de/wiki_syntax_detailed_textile.html) of the help too? AFAICS they are completely untranslated at the moment...

I'll do my best, depending of free time and come back when i ready ;)

#5 - 2021-07-29 09:57 - C S

- File *wiki_syntax_detailed_markdown.html* added

- File *wiki_syntax_detailed_textile.html* added

It went faster than expected ... the translations of the detailed help files are attached. They are based on the current status of the online help and are accordingly fed with more information than the English offline help.

All 4 files are translated and attached here. There is another file "wiki_syntax_markdown2" in the directory, no other languages does contain it...i think

it should be removed.

That file isn't part of the Redmine core source as visible in [source:/trunk/public/help/de](https://source.trunk/public/help/de).

#10 - 2022-08-25 08:56 - C S

- File de-Helpfiles-5.0.2.zip added

Hello,
I have created a newly created language pack of all help files here.
It contains:
textile - syntax
textile detail
markdown syntax
markdown - details
common markdown syntax
common markdown - detail

Redmine version 5.0.2 served as the basis
In all detailed descriptions (also in the English original version) the description for the creation of a table is missing (it is only contained in the syntax) -
I added this as anchor 15

Greetings, Carsten

Since the improvement should be made to all languages, I removed the part for now.
