

## Redmine - Patch #35648

### Changelog generator should allow merging two or more versions

2021-08-01 10:15 - Marius BALTEANU

<b>Status:</b> New	<b>Start date:</b>

<b>Target version:</b>	
<b>Description</b>	
<p>The script used to generate the changelog for releases should allow merging two or more versions. For example, for the latest releases, we generated the changelog for two versions:</p> <ul style="list-style-type: none"><li>- 4.1.4</li><li>- 4.2.2</li></ul> <p>The changelog for 4.2.2 should contain also the changes for 4.1.4, but the script doesn't do this and we need to manually merge the changelogs which is very error-prone.</p> <p>Also, the script should allow authorised requests in order to pull the security issues which are private at the time of the releases. The authorization should use environment variables.</p>
