Redmine - Feature #3565

DateTime stamp in addition to 'Updated x days ago.."

2009-06-30 20:33 - Alex G.

Description

It is useful to know the exact date/time when the issue was changed, and currently this is not possible since we have the only *"x years/months/days/hours or minutes ago"* message (note, that time is rounded in that case).

It would be great to have the remark at the end like *"Updated by Jean-Philippe Lang about 1 year ago (2008-06-02 12:34:56)"* or somehow similar to it.
Or the option is to have a global setting which allows to change the time difference format from "ago"-message just to the DateTime stamp.

I believe that's the minor change, but that's save a lot of time getting the info when the issue was commented or updated.

Associated revisions

Revision 2803 - 2009-07-04 14:36 - Jean-Philippe Lang

Adds issue last update timestamp (#3565).

We have time stamp, its a hover box text(Mouseover)

Look at this screen shot.
