Redmine - Feature #3587

Change reply subject to be a link to the reply itself

2009-07-05 20:19 - Harri H

Target version:	0.9.0			
Resolution:	Fixed			

Description

At the moment creating a link to a specific comment requires finding out the message-id ('message-XXX') manually from the HTML. Would help a lot if the comment subject was a link to the comment itself, as it is on several other message boards. Or there could be a separate icon/link for linking to the comment (see, for example, http://stackoverflow.com).

Additionally, it might be a bit cleaner to mark the message id in comments like this

```
<div class="message reply" id="MESSAGE-ID">
    ...
</div>
```

instead of this

```
<a name="MESSAGE-ID"/>
<div class="message reply">
    ...
</div>
```

Both markups should work in the same way in current browsers, and using the id is apparently HTML5 compliant while using the anchor name isn't (http://stackoverflow.com/questions/484719/html-anchors-with-name-or-id/484892#484892).
