<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Third-party libraries	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	4.0.9
<b>Resolution:</b>	Cant reproduce		
<b>Description</b>			
An error occurred while installing rmagick (2.16.0), and Bundler cannot continue.			

### History

#### #1 - 2021-09-20 16:43 - Holger Just

- Category changed from Administration to Third-party libraries
- Status changed from New to Needs feedback

To install rmagick, you need to have imagemagick (and it's development headers) available on your server. Please try to install those with your package manager.

If this still does not work, please describe your issue in more detail. Make sure to include at least:

- your operating system and version
- The exact and full output of the bundle install command you are using as well as the command itself

#### #2 - 2022-01-05 07:55 - Marius BĂLTEANU

- Status changed from Needs feedback to Closed
- Resolution set to Cant reproduce

Please reopen with the requested info if you still experience this issue.
