Target version:			
Resolution:			

Description

After specifying group option on issues list, It may be difficult to know what group option specified for list (e.g. group by "start date").

  not-display-group-option.png

Therefore, I propose an improvement to display the caption of the group option in the list, as shown in the screenshot below.

+1

With the implementation of default custom queries, this feature is more necessary.
When someone sets a default custom query grouped by due_date, others cannot understand what date it is.
